According to the wiring diagram, there should be a BLUE and WHITE wire from the 4th pin of the flasher unit, to the trailer indicator warning light. I'll try and run a wire from the flasher unit to the clocks tomorrow (beaten by the lack of daylight), and see if the blue and white wire is present in the multi-plug at the back of the clocks.

My Transit: 2015 350 XLT 12-passenger van. Factory Stereo: CD + 4.2" multi-function LCD What I learned and questions: 1) The Reverse indicator light is a royal pain. This post has a nice pic of the harness it's in, but 2 things: 1) Nowhere could I find a diagram of which pin was what number. There were numbers on the back, but they were useless.

The switches are simple on/off style with an indicator light located in the center console between the driver and passenger seats. If the key is in the ignition or run position and the switches are turned on (flipped up), they provide a 12 V and 20 A max output.

### Ford Transit Upfitter Switches - Morey's In Transit

Connect red to the yellow with green stripe and black to the purple. If the meter reads 12.x volts, the yellow with green is the positive. If the meter reads negative 12.x volts, the purple is the positive. If there isn't any current going to the connection, test for resistance from each wire to ground.
