Welcome to Bingham Nerve and Muscle. Bingham Nerve & Muscle specializes in state-of-the-art nerve and muscle testing (electromyography or EMG/NCS). Electromyography is the standard for accurate and comprehensive evaluations of the peripheral nervous system (the “electrical system” of the body or the “wires” of the arm and leg).

Each listed muscle also includes the spinal nerve root level that contributes to the muscles innervation. The parenthesis () next to the spinal nerve root means this level contributes to the innervation but is not the primary nerve root. For example: the serratus anterior muscle is innervated by the long thoracic nerve with contributions from spinal nerve root C5, 6, 7 (8).

Nervous System and Muscular System Actions such as leaning over and picking up a dropped pen involve the coordinated effort of numerous muscle groups. Your conscious mind relays this command to your CNS, which translates it into electrical impulses.

Pinched Nerve in Arm: Causes, Symptoms, Treatment, Prevention

Any kind of damage to motor nerves can cause frequent muscle cramps or twitching. Because the motor nerves are interlaced with the muscles, even minimal nerve damage can result in muscle cramps. At the same time, cramps and twitching can further pull on the nerves, potentially causing more damage.

A muscle twitch is an involuntary contraction of the fibers that make up a muscle. Nerves control muscle fibers. When something stimulates or damages a nerve, it causes the muscle fibers to...

Muscle twitch: Causes, symptoms, treatment, and prevention

A neuromuscular junction (or myoneural junction) is a chemical synapse between a motor neuron and a muscle fiber. It allows the motor neuron to transmit a signal to the muscle fiber, causing muscle contraction. Muscles require innervation to function—and even just to maintain muscle tone, avoiding atrophy.

Neuromuscular junction - Wikipedia

Nerve cells and muscle cells are excitable. Their cell membrane can produce electrochemical impulses and conduct them along the membrane. In muscle cells, this electric phenomenon is also associated with the contraction of the cell.
