Solution for exercise 1.4.9 in Pitman Question a) In scheme A all 1000 students have the same probability ( $\frac{1}{1000}$ ) of being chosen. In scheme B the probability of being chosen depends on the school. A student from the first school will be chosen with probability  $\frac{1}{300}$ , from the second with probability  $\frac{1}{1200}$ , and from the third with probability  $\frac{1}{1500}$

### **Probability Jim Pitman Solutions**

This is a passable book on probability. It is a halfway house between undergraduate probability and measure theoretic probability. Generally speaking, it lacks rigour; statements like "the proof is surprisingly difficult so we only give a heuristic justification" are not good enough, especially when the author does not then bother to refer the reader to a source where the proof can be found.
