In China, Russia, India, Mexico, and South Africa, as well as in most other developing and transition economies, spatial and regional inequality – of economic activity, incomes, and social indicators – is on the increase. Spatial inequality is a dimension of overall inequality, but it has added significance when spatial and regional divisions align with political and ethnic tensions to undermine social and political stability.

Spatial Inequality and Development - Oxford Scholarship

There are two main views of social inequality within sociology. One view aligns with the functionalist theory, and the other aligns with conflict theory. Functionalist theorists believe that inequality is inevitable and desirable and plays an important function in society. Important positions in society require more training and thus should receive more rewards.
