VMware Identity Manager 19.03.0.0 - Carl Stalhood

VMware Identity Manager synchronizes the Citrix-published resources and entitlements from the Citrix farm to the VMware Identity Manager entitlement store. Synchronization occurs based on the frequency set in the schedule. The Citrix farm is the single source of truth for all supported operations in VMware Identity Manager.

Integrating VMware Identity Manager with Citrix-Published ...

The VMware Identity Manager service includes a default access policy that controls user access to their VMware Identity Manager resources. The authentication session length configured in the policy rules determine the maximum amount of time users have since their last authentication event to access their apps launcher page or to launch a specific Web application.
